Profile

Software Engineer with almost 3 years of experience building scalable RESTful APIs using Node.js, Express.js, TypeScript, and MongoDB/Mongoose. Skilled in developing and optimizing backend features, including secure JWT-based authentication, WebSocket-based real-time communication, and third-party API integrations. **Goal:** To continuously improve my skills and deliver efficient, high-quality software solutions while contributing to reliable backend systems within a strong engineering team.

Experience

Nodejs Developer
AAIT company
04/2024 – 07/2026

- Designed, developed, and maintained backend services using **Node.js and MongoDB** to support core product functionality.
- Worked closely with cross-functional teams to architect and deliver **scalable, high-performance backend systems** with a focus on reliability and maintainability.
- Proactively stayed up to date with backend technologies, applying best practices to improve code quality and system efficiency.
- Collaborated with team members to **exchange knowledge, mentor peers when needed, and strengthen the team's overall technical capability**.

Nodejs Developer
CodeClick Company
01/2024 – 04/2024

- worked on a comprehensive ERP system tailored for multi-departmental operations, optimizing organizational efficiency and coordination."

Nodejs Developer
Rmoz Company
10/2023 – 12/2023

- Contributed to the creation of a user-friendly Quran study application, facilitating comfortable interaction between students and teachers through seamless session management.

FreeLancing
07/2023 – 09/2023

Projects

Med Excellence
A full-featured medical education platform designed to manage exams, monitor user performance, and deliver detailed analytics. Integrated with ChatGPT to support intelligent learning, the system features a modern, user-friendly interface for an optimized user experience.

ABR
a **real-time** service **marketplace platform** with role-based access control and feature-tiered subscription packages, delivering enhanced data and insights

My Engineer
a Node.js–based service platform with a **dynamic service order form** that adapts to departments and sub-departments, enabling providers to respond with pricing and timelines, with real-time communication and order management.

Auctions
Developed backend services for a multi-category auction platform (vehicles, equipment, jewelry, and more) with **real-time bidding**.

HelpMe
a multi-platform service mediation app connecting users with service providers, featuring dynamic service requests, real-time communication, offer management, and role-based dashboards for clients, companies, and delegates.

Haki — Parental Smartwatch Monitoring Platform
Node.js, Express, MongoDB, Socket.io, TCP ,Agora
Backend platform for a kids' GPS smartwatch service, enabling parents to track children in real time, manage geofenced safe zones, and remotely control connected devices. Built a custom TCP server to communicate directly with smartwatch hardware, a subscription-based monetization system with feature gating

Education

9-Month Professional Diploma
Information Technology Institute(ITI) Mansoura Branch
OpenSource Track
10/2022 – 07/2023

Skills

Backend (Node.js):

- *Node.js, Express.js*
- *RESTful API development*
- Authentication & Middleware — experience with JWT, Passport.js, and Express middleware

Tools & Version Control:

- Git, GitHub

Databases:

- *MySQL , MongoDB*
- Linux, Bash

Frontend:

HTML5,CSS3, Basic knowledge (JQuery,ReactJS)

Personal Skills:

- *Collaboration and Presentation skills*

Bachelor of Science (BSc) degree in Computer and Information Science

Mansoura University — Medical Informatics Department ,GPA: 3.33 (Very Good)

2018 – 2022

Graduation Project: Brain Speller — EEG-based communication system for paralyzed patients (Grade: A+)

Languages

Arabic:

Native

English:

Very Good
